Why Shelter Inu ?

Pets are part of our lives, we adopt them, we love them, they become a part of our families, a part of us. All around the world, animal cruelty and pet abandonment is still at a scary level.

As dozens of dog meme tokens being adopted everyday have been abandoned, that's about thousands and thousands for months, abandoned like real dogs and other animals are. Difference with Shelter Inu is that we can use the blockchain to make it better for our little furry friends in real life.

Each year, approximately 6.5 million companion animals enter shelters, out of it only 3.2 million are adopted and around 1.5 million are euthanized. And that's only for the USA.

Shelter Inu is a shelter meme token that will help abandoned pets through shelters and associations, that are overwhelmed and cannot provide for the needs and welfare of abandoned animals over the time, and have to see millions of them being euthanized every year. As a community we could help thousands if not millions of little beings !

Let's make our trading profitable and resolve the actual and real problem of our society.

Rethink the system

On BSC, we see a tremendous amount of money circulating, a huge volume almost \$8MM each day. Meme tokens are king there, and the volume is getting bigger every day. On every project, we have long-term holders, short-term traders. Long-term holders are the ones who allow the price to stay stable. Short-term traders are the ones who usually kill the project, that they don't even read the WP or know what the project is about.

Taxes make short-term traders become an important part of the ecosystem:

- With the reflection tax, they distribute their share to holders
- With the liquidity tax, they allow the liquidity to get more stable
- With the Shelter tax, they will directly help the team to market on the long-term, to make weekly donations and to move forward with Shelter Inu's vision

This way, Shelter Inu's ecosystem has been designed to be sustainable. A high volume of trading is ultimately what will allow us to realize our mission. Community Meme Token with a goal.

Donations

Shelters face a lot of problems. They have to accept animals, they cannot take care of the whole population they accept, sometimes other species than the usual dog or cat. They are overcrowded, their lack of space, volunteers and healthcare equipment. One thing can resolve that: FUNDS.

Weekly donations are planned, every Thursday the community will choose through a poll which Shelter/organization will benefit from our donation.

So many animal shelters need help, that's why we will do it weekly and we can also split the donation to make more and more animals benefit through this.

What more you can do:

Adopt a shelter animal

Volunteer at your local shelter

Donate items to your local shelter

Buy items on a shelter's wishlist

Make a difference !

Roadmap

Phase 1

- Website
- Whitepaper
- Presale
- Listing of \$SHINU
- Marketing program
- Community Events
- Audit
- Weekly Donations

Phase 2

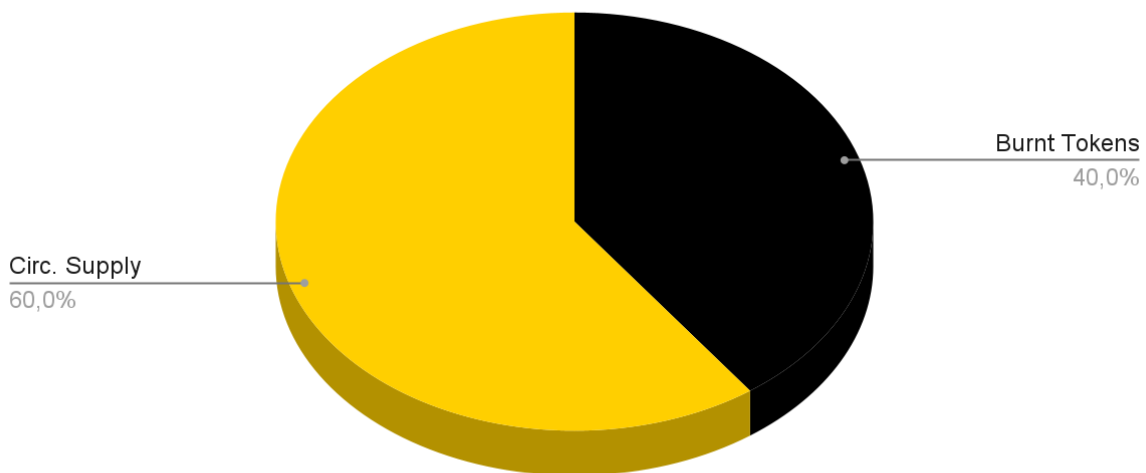

- Coingecko Listing
- CMC Listing
- Team Expansion
- Website v2
- Blockfolio, Delta and other major listings
- Community Events
- AMAs
- Weekly Donations

Phase 3

- Exclusive Partnership
- Marketing Push
- Found our own Shelter
- Celebrity involvement
- Merch
- NFT with real use case
- Weekly Donations

Tokenomics

\$SINU Total Supply: 1,000 Trillions (1,000,000,000,000,000)

NO TEAM TOKENS

40% of the supply is burnt, leaving 600,000,000,000,000 for circulating supply

Tax

10% tax is applied to every transaction:

🌍 **Reflection tax:** 4% is redistributed proportionally to holders, as a passive income

🐷 **Shelter tax:** 4% is redistributed to the Shelter wallet for marketing, donation and to move the project forward

🏛️ **Liquidity tax:** 2% sent to the liquidity pool to ensure the stability of the liquidity, so to holder funds
